Since TGI's original conception in 1990, the company's mission has remained solid—provide tier-one application software functionality at a price-performance level that can be readily accepted by organizations of all sizes, while also implementing in a period of time acceptable to the company without creating a major disruption in the ongoing daily business operations of the organization. TGI's Enterprise Series is a powerful product line created for manufacturers and distributors alike.

From five users to 1,000 users, Enterprise 21 is a scalable ERP system that delivers highly configurable functionality. Designed around industry best practices, Enterprise 21 is intuitive enough and adaptable enough to manage even the most complex manufacturing environments. Enterprise 21 goes beyond standard MRP by providing a flexible manufacturing environment that supports a wide range of processes including make-to-order, make-to-stock, configure-to-order, repetitive, and mixed-mode manufacturing environments. Enterprise 21's manufacturing module offers robust forecasting, advanced planning and scheduling, production recording, and reporting. In addition to the core manufacturing capabilities, Enterprise 21 provides functionally rich technology for usage throughout the enterprise.

As part of the standard package, Enterprise 21 includes user-based dashboards with integrated DSS capabilities, 360-degree CRM support, a complete warehouse management system, and a flexible financial report writer. Enterprise 21 also includes fully enabled integration to a variety of third-party packages such as Microsoft Office and Outlook, MapPoint, EDI translators, RF and data collection equipment, barcode printers, freight carriers, email and fax servers, ad-hoc report writers, and credit card processors.

The latest release of Enterprise 21 now offers the industry's first "self-implementing software" or SIS. Designed to hedge against project delays, budget

overruns, and overall failures, Enterprise 21's new approach to software implementations is innovative and truly the first of its kind for higher end ERP and accounting systems. The self-implementing software process delivers fast and efficient project management right from within the Enterprise 21 software application. Newly installed Enterprise 21 customers are given an imbedded project plan, online how-to based help files, video tutorials, and an integrated training system to test and certify employees.

Focused on long-term growth, TGI is dedicated to exceeding customer expectations by providing exceptional service from the sales cycle, through implementation, and well after go live. TGI encourages an organized, analytical selection process and offers free software selection tools to ensure the best solution is chosen for each project. Once purchased, TGI offers a worry free purchase experience by providing source code, one year free maintenance, and a money-back guarantee with each sale. During implementation and through go live, TGI offers superior support through its technical team whose average tenure exceeds ten years with TGI and Enterprise 21.
